BATHS Interface Specification

0/4

Define back-end classes

0/1

Version Control (GIT)

Set-up J Units

+ Add task

List all methods required by the BATHS interface.

1/1

List all necessary back-end classes (e.g., Ship, Encounter, Squadron)

Define fields and data types for each class

Code and test back-end supplier classes.

+ Add task

Implement constructors and toString() methods.

Implement methods in the SeaBattles class as specified in the BATHS interface. Ensure that only methods specified in the interface are public.

+ Add task
